Programming Languages: Dart, Java, Basic Python

PROJECTS

Smart Calculator

Flutter | Dart

- Published a calculator application on the Google Play Store.
- Google Play: https://play.google.com/store/apps/details?id=com.jbytelabs.calculator

Dharti Irrigation — Irrigation Inquiry Management App

Freelance Project | Flutter, Dart, REST API, JWT Authentication, Django Backend

- Developed the mobile application to help an irrigation agency manage customer inquiries.
- Integrated REST APIs with the Django backend to connect the mobile app with application data.
- Implemented JWT-based authentication integration for secure API communication.
- Worked under the guidance of Hasmukh Sir Mer (Assistant Professor Gujarat Vidyapith) on the project.

Role: Mobile Application Developer (Flutter)

Backend: Developed by the project supervisor.

Rasoi — Recipe Application

Flutter, Dart, Firebase, Cloudinary

- Developed a recipe application with guest browsing and user authentication.
- Implemented recipe add, edit, and delete features and organized recipes by category.
- Used Cloudinary for image handling.
- https://github.com/Gautambhaliya/Rasoi

MausamApp — Weather Application

Flutter, Dart, OpenWeatherMap API

- Built a weather application that retrieves weather information using the OpenWeatherMap API.
- https://github.com/Gautambhaliya/mausamapp
